# XDM 100

DYNAMIC USB MICROPHONE FOR STREAMING AND GAMING

The XDM-100 is a professional dynamic USB microphone optimised for streaming and gaming. It delivers rich, broadcast sound with superior room noise rejection and features premium circuitry, including an ultra-low-noise, high-gain Revolution Preamp™ and high-resolution A/D conversion. It has a zero-latency 3.5mm headphone output with level control and mute functionality and comes with a high-quality pop shield and shock mount. The XDM-100 also comes with a free download of UNIFY virtual mixing software, which unlocks advanced audio processing, powered by internal DSP. Together, they offer a complete audio solution for streaming and gaming.

- Professional dynamic USB microphone
- Complete audio solution for streaming and gaming with included UNIFY software
- Rich, detailed audio capture optimised for voice applications
- Superior room noise rejection
- Zero-latency headphone output with level control and mute button
- Internal DSP for advanced audio processing
- Plug-and-play USB-C connectivity with 24-bit, 48 kHz analog-digital conversion
- Pop shield and shock mount included
