

NTG4+

BROADCAST SHOTGUN MICROPHONE WITH BUILT IN BATTERY

The NTG4+ is a professional shotgun microphone with an expansive feature set that makes it incredibly versatile. It is super lightweight, making it ideal for use on a boom or on a camera. Its low-noise circuitry and clean, crisp sound also make it an excellent microphone for voice-over and livestreaming applications.

The NTG4+ has a highly directional supercardioid polar pattern and features a high-pass filter, a -10dB pad for recording loud sound sources, and a high-frequency boost for compensating for the dulling effect of using a fluffy windshield. It can be powered by either P48 phantom power or its internal rechargeable lithium-ion battery, which offers over 150 hours of operation from a single charge.

- Broadcast sound quality
- Low noise circuitry
- Condenser transducer
- Rugged metal construction
- Internal rechargeable battery with 150 hours operation
- High Frequency Boost
- High Pass Filter (0Hz/75Hz)
- PAD Button (-10db)
- Designed and manufactured in Australia
- Full 10 year warranty with online registration

10 YEAR WARRANTY

HIGHLY DIRECTIONAL

DUAL POWER

ACOUSTIC & ELECTRICAL SPECIFICATIONS

Acoustic Principle:	Line gradient
Capsule:	0.50"
Polar Pattern:	Supercardioid
Address Type:	End
Active Electronics:	20Hz - 20kHz (selected HPF @75Hz)
Output Impedance:	200Ω
Maximum SPL:	135dB SPL
Sensitivity:	-32.0dB re 1 Volt/Pascal (25.00mV @ 94 dB SPL) +/- 2 dB @ 1kHz
Equivalent Noise Level:	16dBA (A-weighted)
Power Requirements:	P48 and Inbuilt rechargeable battery
Output Connection:	XLR

MECHANICAL SPECIFICATIONS

Weight (grams):	176
Dimensions (millimetres):	Height: 278 Width: 22 Dimention: 22
Compatible RØDE Accessories:	Blimp, DeadCat, WS6, Boompole Pro, Pivot Adaptor
Included Accessories:	1 x RM5 1 x ZP1 1 x Windshield
