

# VXLR PRO

TRANSFORMER-BALANCED 3.5MM TO XLR ADAPTOR

The VXLR Pro is a 3.5mm female TRS mini-jack to male XLR adaptor for connecting RØDE on-camera microphones such as the VideoMic NTG to devices with an XLR input. It features a transformer to balance the signal, making it ideal when using long cable runs. It also converts 12-48V phantom power to 4V plug-in power, allowing microphones like the VideoMicro and VideoMic GO to receive power from XLR devices, and features a locking connector for added security.

- 3.5mm TRS mini-jack to XLR adaptor
- Transformer-balanced output
- Converts 12-48V phantom power to 4V plug-in power
- Locking connector
