IMPORTANT SAFETY & REGULATORY INFORMATION

1. Read and understand the instructions and safety guide completely before using the product.
2. Ensure both the instruction manual and safety guide are accessible to all users, including when passing the product on to third parties.
3. Do not use the product if it was damaged during transportation.
4. Use the product only in the ways described in the instructions.
5. If the product requires your attention (operating machinery, driving etc.), stop using it immediately.
6. Do not expose the product to liquid, rain or moisture, or do not operate normally.
7. Service or repair is required for products that have been damaged, disassembled or otherwise altered.
8. Do not adjust the controls of the product in an environment that may cause overheating or explosion.
9. The apparatus should not be connected with a power supply source that requires your attention (operating machinery, driving etc.).
10. Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion or the leakage of flammable liquid or gas.
11. Battery cannot be subjected to high or low extreme temperatures, low pressure or vacuum, or exposed to liquid, rain or moisture, or do not operate normally.
12. Replacement of a battery with an incorrect type that can result in an explosion or the leakage of flammable liquid or gas.
13. A battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
14. Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.
15. Do not use the product in an environment that can result in an explosion or the leakage of flammable liquid or gas.
16. Explosion or the leakage of flammable liquid or gas.

NOTE: FOR USE IN THE USA

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

FCC ID: 41187224

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

EU COMPLIANCE STATEMENT

RØDE Microphones hereby declares that the Wireless GO II transmitter and receiver are in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. A copy of the EU Declaration of Conformity is available at rode.com/distributors

Transmission Power: < 10mW
Frequency Range: 2.402 – 2.480 GHz

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Frequency bands in which interference may occur:
- 5150 – 5350 MHz

NOTE: FOR USE IN SOUTH KOREA

This is a wireless device that operates in the frequency band of 2.400 – 2.500 GHz. It automatically selects channels in which interference is unlikely to occur. If the device malfunctions, check the surroundings and try moving the wireless device to an area where the frequency band is not used. If the device still malfunctions, contact the frequency band operator.

These frequency bands are used for radar services. Interference may occur when devices are used near other wireless devices. If interference occurs, move away from the wireless device and the frequency band operator.

Use of this device in other countries

If you use this device in other countries, check the country information in the device's user guide for more information.
